Zero waste management

Add value to waste

Sustainable design

Introduce circular concept

Limit virgin material input

Renewable energy in operations

Return of materials

6-R Strategy

Increase the lifetime of product

Maximize the use of the product

Product as a service

ZERO WASTE MANAGEMENT

Lowering costs by avoiding waste and improving operations

Valorization and upcycle of waste streams to new revenue models or CSR

**Facilitating waste trade:
One company's waste is another company's resource**

ACCELERATE GROWTH

Building your own start-up within your company to create more revenue

Reaching sustainability targets while improving brand/company reputation

Developing new business models to engage with and reaching out to new customers

LIFE-CYCLE THINKING

Assessing the life cycle of products in relation to the carbon footprint

Developing value and supply chain relationships to fulfil material needs

Supporting companies in designing out waste and continuous availability of (scarce) resources
